Subject: [SSGM Plugin] Automatic Parachutes

This plugin adds support for automatic parachutes when jumping out of flying vehicles or configurable whenever a player falls. I used code from OnOeS for the parachuting logic so credits go to Hex, pvstchlag and jnz.

To install place 'automatic_parachutes.dll' and 'automatic_parachutes.ini' in your FDS folder and add an entry for 'automatic_parachutes' under the [Plugins] section of ssgm.ini.
