Goztow wrote on Tue, 30 August 2011 14:21 Yes, you did miss smth, I guess.

<http://www.alfahosting.be/linux-hosting.php>

Hostgator is a bit more expensive when comparing the similar sets but also seems to offer more.

EDIT: nvm forgot that Hostgator was dollars so is actually around €5,- cheaper. (except the first time; domain registration gets added, although atm they offer 20% off which is about that price)
