the ref_tib_dump~ thingies don't seem to be working on both ref's, plus you dont have the mnref_ag_4~ set up but that may be intentional. I would have put up a screeny but for some reason I can no longer take screen shots in ren since installing tt4 (not sure why).

Also I get some huge FPS drops when I'm near the water falls or the center trees (might just be my crappy vid card).

Aside from that and what others have mentioned I really like this map an amazing amount of detail; never seen anything like it on Renegade.
