That is lame.

And I've Noticed that when I've installed the patch it removed all sounds & animations.

Sounds that were included in CP1&2 like "I got a present for ya" when you deploy a remote c4 and the same thing with timed c4.

And the only animation that was removed was the oblisk effects example in the attachment.

Its not the end of the world without those things but its kinda strange

T.T beta patch was great but it still have some things to fix, e.g wide screen and other things etc..
