---

i wish i could make my own maps just like the great ACK and his wonderful maps, but the thing is i dont know shiznit about makin maps, i am a little familiar with the gmax and renx and tools like that, but the thing is that all the tutorials are a bit fast for me, if anyone could help me make my own map with a complete, step by step tute, i got ACKs, ACKs a little compicated for my small brain, even though its a good tutorial for those that are really good at renx or gmax, so all i am askin is does anyone have a step by step tutorial anywhere i could download or just go to the page,???

thank you

all respects

:oops:
