I'm going to assume one of three things happened:

A) You cheated, and now that you're attempting to use 4.0 with cheats, you got kicked out of the server by the anti-cheat program.

B) You mouthed off to a server administrator and got kicked out and/or banned.

C) You're an asshole and people kicked you out because of it.

Take your pick.

Quote:If all you have to look forward to everyday is booting people from Renegade servers to make yourselves feel better, than maybe its time you get a serious life. Move outta moms house, get a job, support yourself, get married, have kids and support them as well. Do something in your life actually worth being respected, rather than just sitting on your sorry immature asses kicking people from Renegade servers all day, trying to make yourselves feel important. Nobody cares about that but you.
