Perhaps a little more specifics for what we're looking for.

Knowledge of HTML (we do not want to have to teach you)

Ability to learn quickly

Good grammar/spelling skills

A little explanation is at hand for some of these. I've coded the backend to be used as easily as possible, and we don't want to have to keep reminding you how to do it. The HTML skill and grammar skills are required because we review every file we put up. More work for us, I know, but it gives us a higher standard than most.

We'll pretty much take anyone who is competent enough, and of course who we can get along with. We need reviewers for all games (mostly Renegade at this point however), and if you have any skills with PHP I'd be glad to offer you a position, because being the single coder for the whole site is a bit tough

Feel free to email me at [shock@technikality.com](mailto:shock@technikality.com), or catch me in IRC.
