Caveman wrote on Sun, 18 September 2011 03:19 EvilWhiteDragon wrote on Sun, 18 September 2011 02:14 I've asked many times in different threads, but never seen a reply to this question: have you tried changing the SBBO, to a value that matches your connection speed? This because it now actually does something unlike stock ren.

Tbh, people shouldn't have to manually set this everytime they join a server. The client should have it done for them.

+1

I will try it once regardless but after that I can't see 99% of players bothering to modify their ingame experience through the F8 console.
