disrespectful who is there to respect be real . am I suppose to respect people who call names then if you dare answer back they use their powers to kick or ban me ?

they call me a cheat and a ddoser and other names and I am supposed to respect them are you kidding .

now if a mod was to stand out in a game and say hey that just is not right to call mdk that and kick the person then they may earn my respect . but this has never happen as the mods/admins allow their buddies to do as they please and then kick me for responding.?

you all just wish to hate and spread all these lies but in all post I ask for proof ss or video and have we seen any ?
