Gohax wrote on Wed, 21 September 2011 23:35: I have yet to see a problem with this from anyone else.

Whenever I'm ingame, and the map I'm currently on finishes, and the nextmap is a map that I don't have, whenever I start downloading, it loads the load screen once, then loads it again, then I crash.

But, if I minimize Ren, wait until the map loads, and then maximize Ren, it works. But, I've tried minimizing/maximizing about 3 times now, and every time I've done that, I've crashed within 5 minutes of the map.

Now, whenever I go back in Ren, go to the server, it downloads the map and I can play with no problems. So, there's no problems there. It's just annoying that I crash everytime I try and download the map the first time.

The solution would be to download the uber map pack, then you won't have to download any maps at all!

You can download it from here: <http://ren.game-maps.net/index.php?act=view&id=233>
