sure people will find for them self how it will not improve their game .

fine if its good for you and no problems then I am happy for you but it did not work out for me .

yes I could play storm again with it but to be honest dislike all the fan maps and am happy with good old maps field-under-snow also ect.

but with the slow starting games and haveing to upload or remove files all the time was doing my head in then with the memmory manger problem I just gave up on it.

ok guys I know its new and in time may all be debugged and work fine so untill that time I may use it again .
