btw, instead of completely taking out Havocs/Saks why not keep them in with a 2 round magazine ramjet?

If anything else, make them one shot ramjets. Other than that, I'd say take them out.

Though, in all honesty, seeing as how the only way you can really earn money is to attack the enemy base (or just wait for cred flow), I don't think it'd be that bad.

But, if anything, have them one shot ramjets. It'd basically just be pics/ravs with extended range.
