Show people how to make simple batch files to move the files in/out(or even rename the westwood folder) for those who join multiple servers and hate getting their "cheat files" blocked. I'm not sure on all the commands, but I know this works for me when I change my sniper ret's around(lazy).

Open notepad, put in what you want, save as a .bat file, then run it.

Move files to another folder:

```
@echo off
cd C:\test
move /y C:\test\testy\test.txt C:\test\test
```

Rename folder 4.0 to Westwood(4.0):

```
@echo off
cd C:\
rename Westwood Westwood3.4
rename Westwood4.0 Westwood
```

Rename folder 3.4 to Westwood(non-4.0):

```
@echo off
cd C:\
rename Westwood Westwood4.0
rename Westwood3.4 Westwood
```
