iRANian wrote on Wed, 28 September 2011 07:54 Why are sniper servers so terrible? All the players are bad and casually abusing cheats. this cool tmx server lags like fuck and the mods are a bunch of abusing fags (they have t3mp0zia on their mod team lol)

Let's fix a few issues:

t3mp0zia was banned about a 2 years a go as I asked him for a screenshot and he had GDI and Nod dots on his radar, I lol'd.

Edit: It seems he is on the mod team. just shows how out of touch I really am. I'll get it looked into.

I welcome you to create a thread on the forums regarding any abuse from a moderator and it'll be dealt with accordingly. It's true that some of the newer moderators are complete retards, but oh well, they'll learn the right way or get removed.

iRANian wrote on Wed, 28 September 2011 14:33 loki plays on tmx, pretty cool. blatantly aimbotting my head off rofl

Excuse me? I placed a never ending ban on his entire ISP. Unless he's moved city/ISP there's no way that he can join TmX. Give me a date/time when he was ingame and I'll get his new ISP range completely banned as well as he is not permitted to join TmX.

iRANian wrote on Wed, 28 September 2011 14:33 also that place used to have azazel as head administrator and basically changed the core of TmX by adding in a load of good initiatives. Although he stepped down as he couldn't be arsed with sniping in general anymore and was caught cheating while he was a tempmod.

Fixed.

iRANian wrote on Wed, 28 September 2011 14:33 also pretty cool how no sniper server is 4.0 yet.

I wish TmX would be 4.0 as well, but ReLoaDeD simply hasn't got the time to modify stuff at this present time.

1337 was a pretty great server too, I was all for the RR. It's a shame the community ripped itself apart from the inside and the owner couldn't be arsed anymore.
