LOL @ people who didn't educate themselves on the features of the new iPhone 4S and think there's nothing new. The REAL problem is that it doesn't have a new case so people won't be able to recognize the new phone at a glance.

The features on the new phone have me considering moving off BlackBerry and into an iPhone for the first time.

But hey, you guys can enjoy your iPhone and iPad and iPod knockoffs all day long, while cursing the man who transformed the industry for those products.

RIP Steve Jobs. Just proof that all the money in the world can't fix a failing body. Fuck cancer.
