Just don't buy the goddamn hats, and if you're any good you can easily fuck over anyone with some trivial stat boost.

ya, TF2 is still my favorite modern fps and certainly the best free one. QL would be killer with CPMA support, but i can't stand playing quake without instant weaponswitch. warsaw isn't as fleshed out and mostly an instagib game. enemy territory is probably still full of slavs, cheaters and shitty server mods.
