buggy or not RR was a dam piece of work at least from my point of view as a player, and i will miss it, though TT promises to improve ren way further, i have a simple sugestion, could be posible to make the nicks display in the top of the head in the chars? and perhaps integrate the RR launcher whit TT? cause i know you can use it whit TT but you will lose the autodownloader feature and i like ren list but i love RR launcher besides renlist does not show st0rm and noobstories some times.
