I've registered with the Renegade-X.com forums. It said a email confirmation would be sent, which I haven't received with in the 12 hours I've registered. Otherwise I would be posting the next question in the Renegade-X forums.(Yes i check the junk folder)

Can anyone give me the latest download link for Renegade-X mod for UT3? I can only find .55 or .552, and .555 is the latest one right? Please give me the link to the latest RenX client!

Thanks!
Knight
