FjordsTS feels really balanced. The only thing that's unbalanced and that Aircraftkiller already addressed is Orca rushes.

I made a modified C&C\_Snow map with some of the changes I wanted to test out for st0rm. It includes FjordsTS' models (with ACK's permission), but I did nerf the Flame Tank, Mammoth Tank and MRLS a bit because they're really nasty on FjordsTS, still are on the modified map. St0rm still needs to put the map in their rotation, although they did put an earlier version with only Arty splash and screenshake reduced in their rotation.
