Hypnos wrote on Fri, 28 October 2011 05:12It isn't a mouse problem, chances of two people getting the same mouse error simultaneously after updating?

Fixing to check if this happens with me, too. I'll edit this post whenever I'm done.

Stealthe wrote on Fri, 28 October 2011 06:23You mentioned you have it reconfigured to a mouse button. Can you try mapping it to a key and see if it is due to that?

As this may fix it if this problem consists of it being on the mouse, and not they keyboard, this should be fixed. 95%, if not more, of the people that use free-aim regularly use it on their mouse.
