fuck you, Bethesda

If you're complaining about that being a lot, what are you thinking? That is quite a small size for a game such as this, I would have expected it to be 10GB or more. Looking at the size of Portal 2 right now, it's almost 12GB and it doesn't pack anywhere near as much content as Skyrim imo.

Most games coming out that I've seen are around 8GB or more.
