I stand corrected; it was actually deleted on my laptop, thus its Symantec Endpoint Protection's Proactive Threat Protection that deleted Game.exe.

As you can see it marked it as a Bloodhound.Sonar.9.

The screenshot shows the Symantec Endpoint Protection 'View Logs' interface. At the top, there is a navigation bar with a shield icon and the text 'View Logs - Symantec Endpoint Protection'. To the right of the bar, the text 'Scheduled Active Scan in progress...' is displayed. Below the bar, the title 'View Logs' is centered. To the left of the main content area, there is a sidebar with the following options: 'Status', 'Scan for Threats', 'Change Settings', and 'View Quarantine'. The main content area contains a message: 'The logs you can view are listed below.' Below this message, there is a section titled 'Virus and Spyware Protection' with the subtext 'Protects against viruses, malware, ar...'. To the right of this section, there is a table titled 'Proactive Threat Protection Logs'. The table has two tabs: 'System Log' and 'Threat Log', with 'System Log' selected. The table has columns for 'Filename' and 'Risk'. A single entry is listed: 'Filename: game.exe, Risk: Bloodhound.'. The table also includes a small shield icon.
