DerWeaselAnyways, WoT 0.7 has been released, bringing bug fixes and new features. Included in the update are camouflage paint jobs you can put on your tanks, and 2 new maps (Marsh and Fjords, he he he..). So if you haven't been on lately, download the update (1.1 GB) and see how it is.

Alphast0rmFjords!?!?!?!?! I think I have seen enough Fjords for the past few weeks.
