don't feel like installing 7-Zip.

Yet you installed the waste of space that is WinRAR instead, despite the fact 7-zip supports many
more formats (including .rar), is much more efficient and doesn't have those bloody annoying
'OMFG REGISTAR WINRAR NAO!!!!!' popups all the damn time.

WinRAR is able to open 7-zip as well so I don't see why he can't open it...

I don't know, I own WinRAR version 3.0 and it does not recognize the format.

@danpaul88:

I don't think it's a waste of space; had it forever.

Didn't feel like installing 7-Zip but guess I will.

Btw, I don't get that annoying register thing your talking about, maybe cause its an old version.
