Black-Cell in 2007. Good times. I have hundreds more where that came from, but I don't have the kind of time to re-upload them all. If only ccfan had bothered to restore the Black-Cell FTP (archive.org snapshot of my portion) after the 2008 crash/attack

Well, maybe later this week I can spend an hour and pick out out a few of the best of the Regs vs. Mods afterparty stuff where the admins turned players into maps and vehicles into toilets, spawned 300 mammals on Islands, and other crazy junk. We'll see.
