Reinstall Renegade in these steps:

Step 1: Install Renegade in admin mode

Step 2: Install 4.0 beta 3

Step 3: Download RenList:

<http://www.renegadeforums.com/index.php?t=getfile&id=13675&rid=24497> (to use to browse GSA servers etc instead of using RR)

RR and scripts 4.0 beta 3 are incompatible and shouldn't be used together as scripts 4.0 beta 3 uses parts of RR.

Step 4: Play.
