Well, I felt like I was being accused for being an amateur when it comes to mapping. It just feels like the criticism is just all negative.

But I am not surprised you don't see it, but fyi, I don't take negative criticism too easily if, especially if they practically say I'm an amateur.

How about we end this discussion, I've decided to make more advanced tutorials, which I will start recording once I post this, since I do have a bit of an urge to prove that I am not an amateur mapper.

We good? K.
