In the Registry:

Computer\HKEY_LOCAL_MACHINE\SOFTWARE\Wow6432Node\Westwood\Renegade\InstallPath

I believe the firstdecade forgot to add the (tm) to the path, not entirely sure.

Set it to something like:

C:\Program Files (x86)\EA\First Decade\Renegade(tm)\Game.exe

^ That's not the actual path for it but something like that... lol.. Just add the (tm) to it and make sure it points to Game.exe
