---

he did continue to do it... and made all sorts of cartoonish e-threats at the same time

he did everything he possibly could to avoid a resolution to the problem he created (created by a long series of deliberate decisions he could've reversed at any point)

the one thing he didn't try was the advice i gave him right at the start, i.e. "just stop being such a mean lady". he'd see his own community completely wiped off renegade before he tried that, and yet the st0rm community still think he was their friend rather than their enemy... oh well
