It currently calls the "Host hook" when TMSG is executed, which is supposed to be triggered when the host sends a message (e.g. MSG command). I added it to the todo to change this to trigger the chat hook instead.

Currently, the host hook can be used by calling AddHostHook from a SSGM plugin or SSGM itself, but not via the same method other hooks are used.

There is no need for him to post the source code; it's a change TT will have to make to make it trigger the chat hook.
