---

i want to use it but i cant find any tutorial anywhere only some farfetched instructions.

id like to know:

do i need to have a full website to use it.

and does anyone has some tutorial how to set up the website repository url

if i want to have objects.ddb for all maps how do i that i only saw something with a .mix package

thanks on advance i hope you can help me

cmom i really just need a way to get them to download objects.ddb is it that hard to set up because i really cant find anything.
