---

i dont have anyhting more specifik

i want to create a script/object that can play as bank for me

and i want to be able for example use !store <amount>

to store money

i dont have more details then that sla.ro helped

if turret rebuild worked with just scripts i should be able to do it that way.

ill get into as soon as i get out of exams

if i get stuck then ill give more details and also code that way its easier to help
