I would get this problem if I used my tdf serial before.

He said IF he used it, which suggests that he isn't now; in which case it would still be a 4.0 issue.

I was refering to this post:

I get this issue with a serial from the original 2002 release. The first time I connect to a server everything is fine, but if I connect again I get the CD key auth error, only happens with scripts 3.4.4 servers. I think it's an issue with scripts 3.4.4 server-side as everyone seems unable to join Jelly Marathon, so it doesn't look like a client-side scripts 4.0 issue.

Servers running 4.0 don't appear to have this issue, I checked it on one of Zunnie's servers and on the Atomix server.
