Crash on M02.mix in Singleplayer (loaded from the "Armored Assault" thing, not a save, but loaded from the save screen), had just destroyed the PP and was outside the PP about to walk in the elevator to go down to the Dam again and I crashed.

This may very well be one of the same bugs I've crashed from before, as I can't read the .dmp files and determine what happened, but I uploaded it just to make sure.
