Anyhow, this is not hourglass edited, it was done from scratch and the gameplay on the map is great.

I like it, others like it, some others dislike it. Big deal

oh.. the anti xwis guy talks, you need to accept dislikes, not act like a stupid.

Olaf should ban (your server from listing), from being a asshole about their server, if you don't like their services, don't use them, remain on gamespy and spam there like you do.
