General HavocWhere is the input01.cfg file? I can't find it anywhere on my PC's hard drive, and i have go view all files/system files turned on. Does it have to be extracted from somewhere?

_General Havoc

It may not be input01.cfg for you, after resetting my default key config a few times I'm @ input04.cfg.

The path is C:\westwood\renegade\data\config (I belive, Im @ work).

If nothing else search for input*.cfg

Let me know if u have any issues.

btw - Please be carefull what key you remap to. So far I have remapped to TAB & F1 w/no problems but when I try to remap to 1 or 2 I was no longer able to use any of my ALT+CTRL/ALT/CTRL + 1/2 radio keys. If you lose functionality because you remapped to a 'bad' key go into the controls menu in Renegade and restore defaults (which changes the 01 etc to 02 and so on).
