Installing Renegade:

- 1. Insert your Renegade CD or The First Decade into your computer.
- 2. Click through the installer and optionally change the install directory, shortcut y/n etc.

Updating Renegade:

- 1. Download the latest TT CLIENT patch (as of writing 4.0 beta4): http://www.tiberiantechnologies.org/downloads
- 2. Run the downloaded file after completion.
- 3. It should automatically detect the installation folder of Renegade. If it does not, use 'Browse' to navigate to the folder you installed it to.
- 4. Click next and select the language you want your Renegade to be in.
- 5. Choose where you want to have the shortcuts placed.
- 6. Click install.

ADDITIONAL INFO: The patch will download the required files depending on your Renegade version and will update it to the latest official patch (1.037) automatically if required.

Frequently Asked Questions (FAQ)

Do I need to install Core Patches?

- No

Do I need to install any of the official patches?

- No

Do I need to install any of the previous scripts.dll?

- No

Do I need to install Renegade Resurrection?

- No

Do I need to install RenGuard?

- No

Something went wrong while following these steps. What now?

- Reply to this sticky and write down the step that is causing you problems (if possible) and we'll try to help as soon as possible.

I encountered a problem. What now?

- If you have a problem with Renegade, create a topic here:
 http://www.renegadeforums.com/index.php?t=thread&frm id=7&rid=23454
- If you have a problem with the TT patch, create a topic here: http://www.renegadeforums.com/index.php?t=thread&frm_id=52&rid=23454 If the problem is a crash, ZIP and include the crashdumps. These are located in: My Documents/Renegade/Client/Debug

Now if you would please make this a Sticky, I'd say installation instruction are up-to-date Also, if anyone has something to add or something is missing, please tell. I wrote these instructions and tested them on a regular Renegade CD installation (pre-1.037) and The First Decade (1.037).
