Installing Renegade:

1. Insert your Renegade CD or The First Decade into your computer.

2. Click through the installer and optionally change the install directory, shortcut y/n etc.

Updating Renegade:

1. Download the latest TT CLIENT patch (as of writing 4.0 beta4):
http://www.tiberiantechnologies.org/downloads

2. Run the downloaded file after completion.

3. It should automatically detect the installation folder of Renegade. If it does not, use 'Browse' to navigate to the folder you installed it to.

4. Click next and select the language you want your Renegade to be in.

5. Choose where you want to have the shortcuts placed.

6. Click install.

ADDITIONAL INFO: The patch will download the required files depending on your Renegade version and will update it to the latest official patch (1.037) automatically if required.

Frequently Asked Questions (FAQ)

- No

Something went wrong while following these steps. What now?
- Reply to this sticky and write down the step that is causing you problems (if possible) and we'll try to help as soon as possible.

I encountered a problem. What now?
- If you have a problem with Renegade, create a topic here:
http://www.renegadeforums.com/index.php?t=thread&frm_id=7&rid=23454
- If you have a problem with the TT patch, create a topic here:
http://www.renegadeforums.com/index.php?t=thread&frm_id=52&rid=23454
If the problem is a crash, ZIP and include the crashdumps. These are located in:
My Documents/Renegade/Client/Debug

----

Now if you would please make this a Sticky, I'd say installation instruction are up-to-date
Also, if anyone has something to add or something is missing, please tell.
I wrote these instructions and tested them on a regular Renegade CD installation (pre-1.037) and
The First Decade (1.037).
