That is the whole reason I didn't add:

"Install 1.037 now"

If you follow these steps, you'll never even have to think about 1.037. Chances are if I start talking about 1.037 people might go and download that. Hence I left any reference to other patches out of these steps and only put it in as a note at the very bottom.

There. I added "ADDITIONAL INFO:" in front of the last sentence specially for you
