common?

dunno what hell-hole you come from, but is it where all the other renecheaters hideout with nothing better to do since theyre banned everywhere

certainly not common here, they do obviously have a bad connotation in general. However that laregly stems from older generations, younger people like myself understand better and it isnt such a sign of disrespect or to appear 'in a gang' or something. Also quite easy to distinguish between that type of tattoo and something that has alot of thought.

i guess it just depends on how your brought up and stuff, shapes your opinions
