I found something.
Today i have been playing alot and the server "crashed" a few times.
However it wasnt a crash if a player "left" the server would stop responding.

I was lucky when late at nigh the person who "left" was one of those that i could talk with.
he told me that he had gotten an error and crashed to the desktop i have his crashdump here.
to summarise a bit:
my server doesnt crash it hangs when a client crashes kicking all players
