## Subject: TT 4.0 Beta 5 Server Single Player Maps
Posted by Sn1per74* on Wed, 13 Jun 2012 00:14:15 GMT

Hello,

 I'm trying to run a single player map on my dedicated server. I copied the M08.mix file into my data folder on the FDS side and change the the first map to "M08" in the TT.cfg. Whenever I run the server, it crashes. Any idea why?

Thanks
