Hey RenegadeForums,

I have been hosting a lot of Renegade resources for a long time on my forums (DCOM Productions), and recently some of you have noticed and messaged me about the forums being removed, along with the content.

I have handed the content over to a 3rd party (Unified Technologies) who will be the caretaker for this content going forward. What happens with the content from here is no longer in my hands since I have given them ownership of the Renegade Scripts forums, and Lua forums.

Happy modding and hope the Renegade community is doing well.

Regards,

David

DCOM/Owner
