To help you decide which script is best to use I have added and compiled documentation for all three of the scripts I mentioned earlier. Any of them would meet your objectives I believe.

JFW\_Destroy\_Self\_Timer

## JFW\_Destroy\_Self\_Timer Class Reference

Destroys an object after a fixed period of time. [More...](#)

```
#include <jfwdmg.h>
```

Inheritance diagram for JFW\_Destroy\_Self\_Timer:

[List of all members.](#)

### Detailed Description

**Author:**

jonwil

This script will destroy the object it is attached to after a specified number of seconds has elapsed.

**Warning:**

Because the object is destroyed (by using `ScriptCommands::Destroy_Object()` rather than killed by `ScriptCommands::Kill()`) may cause unexpected behaviour. If you need to ensure the callback is executed consider using `JFW_Timer_Destroy()`.

**Parameters:**

**Time** Number of seconds to wait before triggering

**TimerNum** Internal ID to use for the timer to avoid clashing with any other timers on the same object

The documentation for this class was generated from the following files:

- [jfwdmg.h](#)

## JFW\_Timer\_Destroy\_Building Class Reference

Destroys a building by applying damage after a fixed period of time. [More...](#)

```
#include <jfwdmg.h>
```

Inheritance diagram for JFW\_Timer\_Destroy\_Building:

[List of all members.](#)

### Detailed Description

**Author:**

jonwil

This script will apply 10,000 damage using the **Explosive** warhead to the object it is attached to after a specific

**Note:**

Although the script is intended for use with buildings it will actually work on any damagable game object

**Precondition:**

Requires a warhead called **Explosive** to be defined in armor.ini. This is already present in stock versions

**Parameters:**

**Time** Number of seconds to wait before triggering

**TimerNum** Internal ID to use for the timer to avoid clashing with any other timers on the same object

The documentation for this class was generated from the following files:

- [jfwdmg.h](#)
- [jfwdmg.cpp](#)

### Detailed Description

**Author:**

jonwil

This script will apply a specified amount damage with a specified warhead to the object it is attached to after a

**Note:**

Although the script name implies it is purely for destroying objects it can also be used to apply a fixed a

**Parameters:**

- Time** Number of seconds to wait before triggering
- Amount** Amount of damage to apply to the object the script is attached to
- Warhead** Warhead to use when applying damage, typically **Death** a good choice here

The documentation for this class was generated from the following files:

- [jfwdmg.h](#)
- [jfwdmg.cpp](#)
