Quote:Install the new version.

Make sure to use the new map files or else 4.0 clients will be unable to join. If you want to revert to pre-4.0 maps, use the resource downloader just like for any custom map. Since beta4, modifications to C&C_Canyon.mix were made.

Update anticheat.ini to include the new map hashes (or use the provided anticheat.ini if you did not add custom hashes).

Port/recompile any modifications. Plugins are likely binary compatible with the new version, but recompilation is recommended to be sure.
