We only have the source to the Tiberian Technologies tools, namely ddbedit.exe, fixplanes.exe, makemix.exe, mergelod.exe, tdbedit.exe, w3ddepends.exe and zorient.exe

makemix.exe and tdbedit.exe source code is in the 4.0 source download. ddbedit.exe is closed source because it contains a lot of code we would rather not release for various reasons.
The other stuff (fixplanes.exe, mergelod.exe, w3ddepends.exe and zorient.exe) are closed source for reasons I dont know exactly.

We do not have source code for wdump.exe or any of the other Westwood tools.
