yeah on area54 it feels like i'm playing on LAN, i hardly miss anything because it's almost harder to miss stuff that hit things

jelly runs ssgm 2.0.2 which lags like fuck, but their server is shit so that's probably, they apparently pay the same amount of money for their servers that ccfan paid in 2006 (which i dont actually believe they do) and still get only 35 sfps when there are 50 players ingame LOL
