I'm working on a list of all the scripts in renegade, you can see it at my website... I'll just give you a direct link:

<http://animefreeway.knkonline.net/modsite/thelist.shtml>

There are approximately 600 scripts, and I have described the 200 most interesting.... A lot of them are only designed for singleplayer and require certain conditionals and other things that you're not likely to have in a regular multiplayer map.... Interesting and useful all the same.
