As you may already know, Me and a few others (I will not name drop) are working on a pretty damn good Tiberian Sun mod for Generals.

I can Model/Map/Skin very well now, and I am considering making a Renegade mod too.

I wan't a mod that is pretty realistic but also has some flare to it as well. I was thinking along the lines of Tiberian Sun meets Rainbow Six (Think the Rainbow Six story happening in the Tiberian Sun world, And I mean the Rainbow six book, not the game. Also, Tiberian Sun, not Reborn...yuk). I would want to do at least 3 multiplayer missons and a couple Team Death Match maps as will.

(BTW, would bring some RTCW:ET elements into it too)

Anybody interested?
