Besides it doesn't matter who loads first or who has the biggest e dick.

It matters what skills you have, bitching about waiting, to me is someone that doesn't have skill to pick up where the fast loaders started.

What would be better is like wolf et where it doesn't start the game until 5 secs after x amount of players join.

Okay jackass, see your way out of this thread. You need to go back to playing in build servers.

I wouldn't be this mean if you didn't make an ass out of yourself.
